DILEC – Digital solutions, Inclusive Leadership and Employee-Centricity in hybrid work

The DILEC research investigates employee-centered and digital solutions for developing inclusive leadership, career path processes, and knowledge transfer from experienced to younger employees. Additionally, the project examines the impact of these solutions on business productivity and the quality of working life.

Research-based solutions

National and international best and newest practices strengthen the competitiveness of companies.

Well-being and productivity

Employee engagement creates a more committed work community, smoother processes and better results.

Practical tools for management

The workbook on digital inclusive leadership and employee-centered development can be used in the everyday life of companies.
